

Brazil Ocean Freight DDP Door-to-Door Service Connecting the “Last Mile” of China–Brazil Trade — Yiwu Yida Brazil Dedicated Line

Brazil, the tropical nation on the South American continent, is renowned not only for football and samba, but also as one of the world's largest consumer markets, with a population of approximately 210 million.

As economic and trade relations between China and Brazil continue to deepen, an increasing volume of Chinese products is crossing the Pacific Ocean and entering households throughout Brazil.

However, complex customs clearance procedures, an unfamiliar tax system, and last-mile delivery challenges often discourage small and medium-sized enterprises from entering the Brazilian market.

Against this backdrop, Yiwu Yida's Brazil Ocean Freight DDP Door-to-Door Service, featuring Export Customs Clearance + Import Customs Clearance + Duties & Taxes Paid + Door-to-Door Delivery, has

emerged as an efficient bridge connecting Made in China with the
Brazilian market.

Sailing Across the Pacific, Delivering to Brazil

Service**

Yiwu Yida Brazil Dedicated Line

Yiwu Yida's Professional End-to-End Solution

Comprehensive DDP Door-to-Door Logistics Service

Dual Customs Clearance (Export Customs Clearance in China + Import Customs Clearance in Brazil)

The logistics service provider is responsible for both China Export Customs Clearance and Brazil Import Customs Clearance, including:

- Documentation preparation

- Customs declaration

- Customs duty calculation

- Communication and coordination with Customs authorities

- The entire customs clearance process

Customers are able to complete compliant import customs clearance without establishing a company in Brazil or appointing a local customs representative.

Duty & Tax Paid

Under the all-inclusive Duty & Tax Paid pricing model, the logistics service provider calculates all estimated import charges in advance based on:

- Commodity type

Declared cargo value

Destination

The quotation includes estimated:

Import Duty

Value-Added Taxes

Other applicable import taxes and charges

This pricing model enables customers to determine their total landed cost before shipment and minimizes uncertainties arising from fluctuations in import duties and taxes during the customs clearance process.

Door-to-Door Delivery

Upon completion of import customs clearance, the cargo is delivered directly through the logistics provider's local distribution network to the designated:

Warehouse

Retail Store

End Customer

The service covers major Brazilian cities and inland regions, including:

São Paulo

Rio de Janeiro

Salvador

and many other destinations throughout Brazil.

The Brazilian Market: Diverse Demand Accompanied by Logistics

Challenges

In the street markets of São Paulo, plastic toys are among children's favorite products.

In the automotive repair shops of Rio de Janeiro, Chinese-manufactured automotive parts are highly favored for their excellent cost-performance ratio.

On family dining tables in Brasília, stainless steel tableware has become increasingly popular.

Meanwhile, as Brazil's industrialization continues to advance, demand for various types of machinery and equipment, as well as textile products, continues to grow steadily.

These product categories represent some of China's most competitive export products to the Brazilian market.

However, Brazil is widely recognized for its stringent import customs clearance procedures.

Its taxation system involves multiple layers of taxes, including:

ICMS (Imposto sobre Circulação de Mercadorias e Serviços) – State Value-Added Tax

IPI (Imposto sobre Produtos Industrializados) – Federal Industrialized Products Tax

PIS/COFINS (Programa de Integração Social / Contribuição para o Financiamento da Seguridade Social) – Social Integration and Social Security Contribution Taxes

In addition, tax rates vary from one Brazilian state to another.

For Chinese exporters unfamiliar with the Portuguese language and Brazil's import regulations, handling customs clearance independently can be as challenging as navigating a maze.

Furthermore, Brazil's vast territory and uneven infrastructure distribution make last-mile delivery from the port of entry to the final consignee one of the most time-consuming and challenging stages of the logistics chain.

Yiwu Yida Selection Guide

Within Brazil's complex trading environment, Yiwu Yida offers a customer-friendly service threshold, with a minimum shipment volume of 1 CBM, providing: Cross-border e-commerce sellers, Start-up trading companies, Small and medium-sized enterprises (SMEs), with a low-risk and cost-effective opportunity to enter the Brazilian market.

Typical Transit Time

A typical transit time of approximately two months represents the standard shipping cycle for an ocean freight solution that effectively balances cost efficiency and transportation reliability.

This transit time includes the complete logistics process, including: Ocean Freight Transportation, Import Customs Clearance, Inland Distribution, Final Delivery. This solution is particularly suitable for: Oversized cargo, Bulk shipments, Cargo with relatively flexible transit time requirements but high cost sensitivity

Professional Local Customs Clearance Capability in Brazil

Yiwu Yida works with locally registered customs brokerage teams possessing extensive experience with customs regulations across different Brazilian states.

Our professional services include:

Tax Compliance Expertise

Providing accurate:

Tax Identification Number (TIN) Verification

Commodity Classification (NCM Code)

Customs Duty & Tax Calculation

Nationwide Last-mile Delivery Network

Maintaining stable trucking fleets and long-term delivery partners throughout Brazil's major economic regions to ensure reliable inland transportation.

Exception Handling Capability

Well-established contingency procedures are in place to effectively respond to unforeseen events, including: Customs Inspections, Labor Strikes, Severe Weather Conditions, Other Logistics Disruption, thereby minimizing the impact on cargo transit schedules.

End-to-End Shipment Visibility

Providing full-process cargo tracking throughout the entire logistics chain, from: Container Loading, Ocean Transportation, Customs Clearance, Inland Delivery, Final Proof of Delivery (POD), allowing customers to monitor shipment status in real time.

A New Trade Corridor Across the Pacific

With the continuous advancement of Renminbi (RMB) settlement between China and Brazil, together with the rapid development of digital trade platforms, bilateral trade is entering a new stage of growth.

The widespread adoption of Yiwu Yida's Brazil Ocean Freight DDP Door-to-Door Service not only lowers the barriers for small and medium-sized enterprises to enter the Latin American market, but also enables Made in China products to reach Brazilian consumers more efficiently through professional and standardized logistics solutions.

For businesses planning to expand into the Brazilian market, selecting the right logistics partner means transforming complicated

international transportation, customs clearance, and distribution procedures into a simplified and controllable supply chain process.

When cargo departs from a factory in China and arrives approximately two months later on the shelves of a merchant in São Paulo or in the living room of a family in Rio de Janeiro, this trade corridor spanning half the globe has successfully fulfilled its mission —connecting production with consumption and creating shared value.

In today's world, where globalization and regionalization continue to develop simultaneously, logistics services that are efficient, reliable, and compliant have become essential infrastructure supporting the smooth operation of cross-border trade, while also serving as a tangible testament to the continuously strengthening economic and trade cooperation between China and Brazil.
