

Air Freight • Ocean Freight • Rail Freight • Road Freight DDP Door-to-Door Service for Oversized Cargo Across Europe— Yiwu YIDA Europe Oversized Cargo Dedicated Line

In 2026, China–Europe cross-border trade continues to gain momentum, with the European market becoming a strategic destination for Chinese cross-border e-commerce sellers and foreign trade enterprises.

However, for oversized cargo such as furniture, vehicle rooftop tents, display screens, machinery and equipment, industrial molds, and other large-scale products, logistics remains the greatest obstacle to expanding overseas.

Traditional logistics channels are constrained by dimensional limitations, complicated customs clearance procedures, and high last-mile delivery costs, discouraging many sellers from entering the European market.

As a professional international logistics service provider with years of industry experience, **Yiwu Yida has officially launched its Europe Oversized Cargo Dedicated Line**, providing a **one-stop logistics solution through Air Freight, Ocean Freight, Rail Freight, and Road Freight**, combined with **DDP (Delivered Duty Paid) Door-to-Door Service**, enabling Chinese oversized products to reach destinations throughout Europe efficiently and reliably.

European Market Opportunities and Logistics Challenges for Oversized Cargo

In 2025, China's cross-border e-commerce imports and exports reached RMB 2.63 trillion, representing a 10.8% year-on-year increase, with China – Europe cross-border e-commerce experiencing particularly rapid growth.

As the European e-commerce market continues to expand and platforms such as TikTok Shop accelerate their presence across multiple European countries, sellers are placing increasing emphasis on logistics solutions that provide:

- * Stable transit times
- * Broad cargo acceptance
- * Reliable customs clearance

However, exporting oversized cargo to Europe presents three major challenges:

Dimensional and Weight Restrictions

Traditional courier and express delivery services impose strict limitations on the dimensions and weight of individual shipments. Products such as furniture, machinery, and vehicle rooftop tents frequently exceed these standard limits.

Complex Customs Clearance Procedures

The European Union maintains one of the world's most stringent regulatory frameworks covering product safety, intellectual property rights, and health standards.

Consequently, oversized cargo is subject to more demanding requirements for:

- * Commodity classification
- * Product certification
- * Customs declaration

Difficult Last-mile Delivery

Oversized cargo requires professional truck delivery services.

Conventional parcel delivery networks are generally unable to handle oversized shipments, while delivery requirements vary significantly among European countries.

Four Transportation Solutions Tailored to Different Logistics Requirements

Yiwu Yida Europe Oversized Cargo Dedicated Line** offers four transportation modes—**Air Freight, Ocean Freight, Rail Freight, and Road Freight**—allowing customers to select the most suitable logistics solution based on cargo volume, transit time requirements, and budget.

Air Freight Dedicated Line — Ultra-fast Transit, the Preferred Choice for Urgent Replenishment

Leveraging long-term block space agreements with major international airlines, we prioritize direct flights whenever possible to ensure stable cargo uplift even during peak shipping seasons.

With a transit time of 4–6 business days, this service is ideal for:

- * High-value equipment
- * Urgent replenishment orders
- * New product launches
- * Time-sensitive commercial shipments

The Yiwu Yida Europe Air Freight Express Line addresses the challenges of cross-border logistics through three core advantages:

- * Ultra-fast transit time
- * Acceptance of a full range of cargo categories
- * Compliant DDP customs clearance

Ocean Freight Dedicated Line — The Most Cost-effective Solution for Bulk Inventory Replenishment

Ocean freight remains the most economical transportation solution for large-volume oversized cargo.

Yiwu Yida provides ocean freight services from major Chinese ports to Europe's principal ports, including: Hamburg, Rotterdam, Antwerp

Combined with destination customs clearance and truck delivery, we provide a complete Door-to-Door logistics solution.

This service is particularly suitable for bulk shipments with less stringent transit time requirements, including:

- * Furniture
- * Large-scale machinery
- * Industrial molds
- * Other oversized cargo

Rail Freight Dedicated Line — The Perfect Balance Between Transit Time and Cost

The China-Europe Railway Express provides a mature transportation alternative positioned between air freight and ocean freight.

Typical transit time is approximately 18–25 days, while freight costs are significantly lower than air freight.

Rail transportation offers minimal vibration throughout transit, making it particularly suitable for cargo requiring enhanced transportation stability, such as:

- * Precision instruments
- * Display screens
- * High-value electronic equipment
- * Sensitive industrial products

Road Freight Dedicated Line — Flexible, Efficient, and Deconsolidation-free Service for Oversized Cargo

China-Europe Road Freight has become increasingly popular for oversized cargo due to its high flexibility and deconsolidation-free transportation solution.

Typical transit time ranges from 12–18 days.

After arrival at our overseas warehouse in the Netherlands, oversized cargo can be unloaded, palletized, and arranged for final delivery.

This service is ideally suited to medium- and short-haul cross-border transportation requirements.

Road freight also represents an excellent balance between rail freight and air freight in terms of overall cost efficiency, particularly for expedited shipments destined for remote inland regions throughout Europe.

DDP Door-to-Door Service — One All-inclusive Price for a

Worry-free Logistics Experience

Yiwu Yida's Europe Oversized Cargo Dedicated Line adopts the DDP (Delivered Duty Paid) service model, providing Customs Clearance at Origin and Destination, Duty & Tax Paid, and Door-to-Door Delivery.

The quoted freight rate includes:

- * Export Customs Declaration in China**
- * Import Customs Clearance in Europe**
- * Import Customs Duties**
- * Import VAT**
- * Last-mile Delivery**

The consignee is not required to pay any additional charges upon delivery.

The Core Advantages of Our DDP Service :

☒ **Controlled Customs Clearance Risk**

Our professional customs clearance team initiates a pre-shipment compliance review before cargo departure, including:

- * Verification of product materials and composition**

- * **Confirmation of required certification documents**
- * **Review of brand authorization documentation**
- * **Preliminary HS/TARIC classification**

This proactive approach minimizes customs clearance risks before shipment.

☒ **Transparent Cost Structure**

Our all-inclusive quotation covers all applicable duties, taxes, and logistics charges, helping customers avoid unexpected costs such as:

- * **Additional import duties**
- * **Customs inspection fees**
- * **Other unforeseen customs-related expenses**

Under the DDP model, the freight forwarder assumes responsibility for customs duties and import VAT in the destination country, eliminating the need for sellers to register for VAT in Europe or complete import customs clearance independently, thereby reducing both operational complexity and compliance risk.

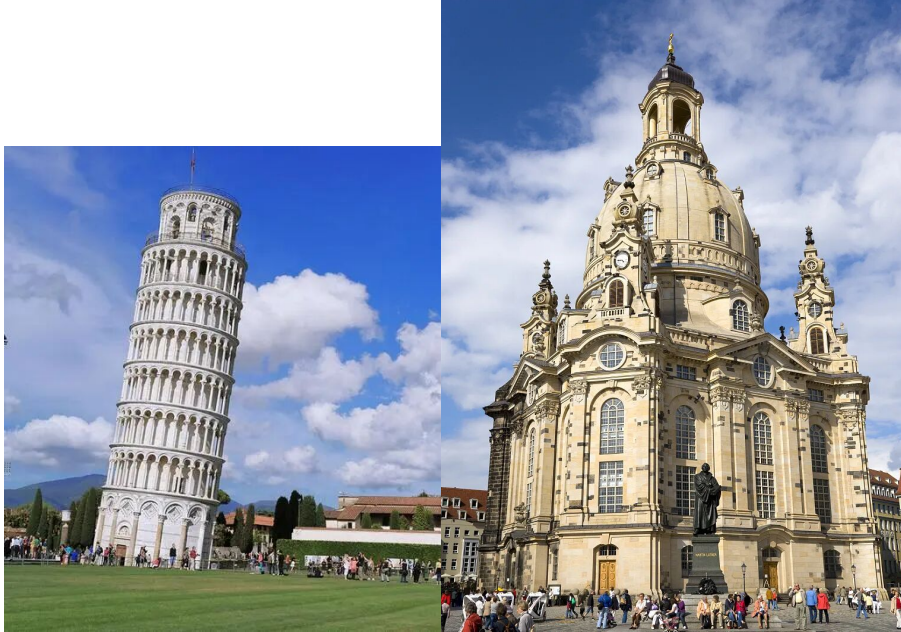

☒ **End-to-End Logistics Solution**

From cargo collection in China to final delivery anywhere across Europe, every stage of the logistics process is seamlessly integrated.

After arrival in Europe, shipments are customs cleared through our local clearance resources at major European gateways, including: Germany, Belgium, The Netherlands.

Final delivery is completed through established parcel and distribution networks such as : UPS, DPD, DHL, GLS, ensuring accurate, reliable, and efficient last-mile delivery throughout Europe.

**Minimum Charge from 21 kg — Comprehensive Acceptance of All
Categories of Oversized Cargo, Regardless of Dimensions, with
Professional Packaging Solutions**

The Yiwu Yida Europe Oversized Cargo Dedicated Line accepts shipments with a **minimum chargeable weight of 21 kg**, with **no rigid dimensional restrictions**, truly enabling customers to ship **oversized cargo with greater flexibility**.

We have extensive experience in handling and successfully transporting the following categories of oversized cargo:

Furniture & Home Furnishings

- * Sofa Sets
- * Solid Wood Wardrobes
- * Large Bed Frames
- * Outdoor Tables and Chairs
- * Custom Display Cabinets

Vehicle Rooftop Tents & Outdoor Equipment

- * Rooftop Tents
- * Towable Camping Equipment
- * Awnings

Commercial Display Equipment

- * LED Video Wall Panels
- * Digital Signage Displays
- * All-in-One Conference Display Systems
- * Industrial Monitors

Machinery & Industrial Equipment

- * CNC Machine Tools
- * Injection Molding Machines
- * Textile Machinery
- * Food Processing Equipment
- * Laser Engraving Machines

Industrial Moulds

- * Large Injection Moulds
- * Stamping Dies
- * Die-casting Moulds

Beauty & Healthcare Equipment

- * IPL Skin Rejuvenation Devices
- * Ultrasonic Therapy Equipment
- * Large Massage Chairs

Flight Cases & Stage Equipment Cases

- * Flight Cases for Performance Equipment
- * Heavy-duty Transit Cases

* Musical Instrument Flight Cases

Regardless of whether your cargo is packed in:

* Cartons

* Wooden Crates

* Pallets

* Irregular or Bare Packaging

we provide a full range of professional value-added packaging services, including:

* Reinforced Packaging

* Palletizing

* Stretch Wrapping

* Custom-built Wooden Crates

* Other Protective Packaging Solutions

To ensure that your cargo remains fully protected throughout long-distance international transportation.

For overlength, overwidth, and overheight cargo, our operations team will develop the most suitable loading plan in advance and

coordinate the required specialized delivery vehicles at the destination port, ensuring that every non-standard oversized shipment can be exported and delivered smoothly.
