

助力绿色能源产品直达美国市场——义乌宜达美国海 派电池专线推荐

Facilitating Direct Access for Green Energy Products to the
U.S. Market

——Yiwu Yida U.S. Ocean Freight Dedicated Battery Line

近年来，美国在新能源汽车、微出行工具及家庭储能领域发展显著。各州政府推出补贴政策鼓励电动车消费，亚马逊等电商平台上电动滑板车、电池组等产品销量持续增长。然而，电池属于危险品，国际运输受到严格监管，普通物流渠道往往无法承接或限制重重。专为电池产品设计的海运渠道，成为许多制造商和贸易商的迫切需求。

In recent years, the United States has experienced remarkable growth in the sectors of new energy vehicles (NEVs), micromobility solutions, and residential energy storage

systems. State governments have introduced incentive programs to encourage electric vehicle adoption, while sales of products such as electric scooters and battery packs have continued to increase on e-commerce platforms including Amazon.

However, batteries are classified as Dangerous Goods (DG), and their international transportation is subject to stringent regulatory controls. Conventional logistics channels are often unable to accept such shipments or impose numerous restrictions. As a result, dedicated ocean freight services specifically designed for battery products have become an urgent requirement for many manufacturers and trading companies.

美国海派纯电池专线：助力绿色能源产品直达美国市场

Enabling Green Energy Products to Reach the U.S. Market Efficiently

在电动出行与清洁能源日益普及的今天，各类电池驱动产品正迅速进入全球消费市场。美国作为电动汽车、个人电动交通工具及储能设备的重要需求国，对相关产品的进口物流提出了更高要求。针对这一趋势，“美国海派纯电池专线”服务应运而生，

为中美电池类产品贸易搭建起高效、可靠的专业物流通道。

As electric mobility and clean energy technologies continue to gain widespread adoption, a growing range of battery-powered products is rapidly entering the global consumer market.

As one of the world's largest markets for electric vehicles, personal electric mobility devices, and energy storage systems, the United States has placed increasingly stringent requirements on the import logistics of related products.

In response to this market trend, the U. S. Ocean Freight Dedicated Battery Line has been introduced, providing an efficient, reliable, and professional logistics solution that supports the trade of battery products between China and the United States.

义乌直达服务核心优势

Core Advantages of Yiwu Yida's Services

1. 专业化电池运输方案

该专线针对纯电池、电动车、滑板车、储能电源、电动机器人等产品设计，提供符合国际海运危险品规则的包装、申报与运输服务。12KG 起收的低门槛，尤其适合中小批量的贸易试单或跨境电商发货。

1. Professional Battery Transportation Solutions

This dedicated service is specifically designed for products including:

- * Pure Batteries
- * Electric Vehicles
- * Electric Scooters
- * Energy Storage Power Systems
- * Electric Robots

We provide packaging, declaration, and transportation services that fully comply with the International Maritime Dangerous Goods (IMDG) Code.

With a minimum chargeable weight of 12 kg, this service is particularly suitable for:

- * Small- and medium-volume trial shipments
- * Cross-border e-commerce orders
- * Sample shipments
- * Regular commercial shipments

2. 全美地址覆盖，清关高效

无论是美国本土的私人地址、商业仓库，还是亚马逊 FB 仓库，该专线均可实现“无忧送达”。服务商通常拥有成熟的美线清关经验，能够协助处理电池产品的相关认证与海关申报，降低扣货风险。

2. Nationwide U.S. Coverage with Efficient Customs Clearance

Whether the shipment is destined for:

- * Residential Addresses
- * Commercial Warehouses
- * Amazon FBA Fulfillment Centers

our dedicated service provides reliable Door-to-Door Delivery throughout the United States.

Supported by extensive experience in U.S.-bound customs clearance, our professional team can assist customers with:

- * Battery product compliance requirements
- * Customs declaration procedures
- * Import documentation

thereby minimizing the risk of customs detention and clearance delays.

3. 波多黎各专线满足特殊需求

作为美国海外领地，波多黎各在关税与贸易政策上与美国本土有所不同，且物流成本通常较高。该专线针对波多黎各推出 300KG+起收的专案服务，为有一定出货量的客户提供直达该区域的优化方案，助力企业拓展加勒比海地区市场。

3. Dedicated Puerto Rico Service for Specialized Logistics Requirements

As a U.S. overseas territory, Puerto Rico differs from the U.S. mainland in certain customs and trade policy aspects, while logistics costs are generally higher.

To address these market requirements, this dedicated service offers a specialized transportation solution for Puerto Rico with a minimum chargeable shipment weight of 300 kg.

This service provides customers with optimized direct transportation solutions to Puerto Rico, helping businesses further expand into the Caribbean market.

4. 安全与合规保障

服务提供方通常具备危险品运输资质，对电池的包装、积载、隔离等环节严格执行 IMDG（国际海运危险货物规则）要求，确保运输安全的同时，也保障客户的货物能够顺利送达目的地。

4. Safety and Compliance Assurance

Our logistics service provider is fully qualified to transport Dangerous Goods (DG) and strictly complies with the requirements of the International Maritime Dangerous Goods (IMDG) Code throughout every stage of transportation, including:

- * Packaging
- * Cargo Stowage
- * Segregation

By implementing rigorous Dangerous Goods operational standards, we ensure not only transportation safety but also the smooth delivery of customers' cargo to its final destination.

注 意 事 项

发货前需提供电池 MSDS、UN38.3 测试报告等文件。

不同电池类型（如锂离子、铅酸等）包装要求不同，需提前确认。

发往波多黎各的货物需注意符合当地进口规定，建议与物流商详细沟通。

Important Notes

Before shipment, customers are required to provide the following documentation:

- * Material Safety Data Sheet (MSDS)
- * UN38.3 Test Report

Different battery chemistries (such as Lithium-ion Batteries and Lead-acid Batteries) are subject to different packaging requirements. These requirements should be confirmed before shipment.

For cargo destined for Puerto Rico, customers should ensure compliance with applicable local import regulations. It is recommended that shipment

details be confirmed with the logistics service provider in advance.
